Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 1-16 are rejected under 35 U.S.C. 102(e) as being unpatentable over Tull, Jr. et al (USPN 5946667) (Tull) in view of Wallman (US 6601044) (Wallman).

Re Claims 1 and 9: Tull teaches a system and corresponding method for developing and administering investment trusts comprising: selecting an investment instrument from a plurality of available investment instruments (col. 3, line 62 - col. 4, line 3); creating an investment trust with the selected investment instrument (col. 6, lines 14-24); trading the investment trust on a

Art Unit: 3691

financial exchange to provide an ownership interest in the investment trust (col. 6, lines 14-24); and redeeming the ownership interest in the investment trust for at least the investment instrument (col. 4, lines 16-19).

Tull does not explicitly teach that the selection of investment instrument is based on a profile associated with an user's preferences. Wallman in the same field of endeavor teaches selecting investment instrument based on a profile associated with an user's preferences (col. 14, lines 29-48). It would have been obvious to one of ordinary skill in the art at the time of the invention to modify Tull to include this feature as taught by Wallman. One would have been motivated to do so in order to ensure that the selected instrument satisfy the investor's risk and return selection or other preferences that the investor may have.

Re Claims 2 and 10: Tull teaches creating a database of investment instruments available for selection (col. 8, lines 50-54).

Re Claims 3 and 11: Tull teaches optimizing which investment instruments are selected to produce a desired growth in equity and yield return at a selected level of risk (col. 3, line 67 - col. 4, line 3).

Re Claims 4 and 12: Tull teaches tracking the value of the investment instrument (col. 17, lines 41-45).

Re Claims 5 and 13: Tull teaches storing value information related to the tracked investment

instrument in a database (col. 17, lines 54-56).

Re Claims 6 and 14: Tull teaches generating a financial report (col. 3, lines 42-45).

Re Claims 7 and 15: Tull teaches determining whether the investment instrument expires; and replacing the investment instrument with a similar investment instrument when the investment instrument expires (col. 4, lines 16-18).

Re Claims 8 and 16: Tull teaches creating a database of investment trusts (Abstract).

Response to Arguments

Applicant's arguments with respect to claims have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

i) McCabe (USPN 6947901) teaches a derivative securities trading product utilizing subsets of indices or portfolios.

ii) Kiron et al (US Patent Application No. 20030004851) teaches open end mutual fund securitization process.

iii) Dictionary of Finance and Investment Terms – pages 297-298 and 301.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
